

Detex™ Blox

Non-Toxic Rodent Monitoring Bait

New DETEX Blox are now available for the monitoring of rodent activity in sensitive areas.

DETEX Blox are completely non-toxic and contain no active ingredient. PCOs can expect the same superior bait acceptance that Bell's Blox baits are known for in the pest control industry. DETEX Blox have been tested and proven highly effective in Europe for more than a year.

A hole through the center allows DETEX Blox to be secured on vertical and horizontal securing rods inside PROTECTA Bait Stations.

Made of palatable inert human food-grade ingredients, DETEX is a weatherable 20-gram extruded Blox with a long field life. After rodent activity has been detected, Bell's CONTRAC BLOX with the active ingredient Bromadiolone can be used to control the infestation.

Packaging: DETEX Blox is available in 4 kg (8.8 lbs.) plastic pails

Specimen Label

DETEX BLOX is a non-toxic, highly palatable bait for monitoring rodent activity in sensitive areas.

Each DETEX BLOX weighs 20 grams.

DIRECTIONS FOR USE:

Bait should be placed in bait stations or otherwise secured and out of reach of non-target animals. Place bait around the periphery of buildings, especially near likely locations of rodent entry, and in areas that provide rodent harborage. Record locations for future reference.

Rats: Place 1 DETEX BLOX every 30 - 50 feet.

Mice: Place 1 DETEX BLOX every 6 - 14 feet.

Inspect bait at least monthly for rodent activity and more often during the autumn season. Replace spoiled bait immediately. If the bait has been gnawed or eaten, replace DETEX BLOX with toxic bait or traps as appropriate until the infestation has been controlled. DETEX BLOX is non-toxic and may be disposed of in the same manner as other food products.
